e-mail:
penggr@mail.nih.gov

The Medical Devices and Implant Science Program supports the design, development, evaluation and validation of medical devices and implants. This includes: exploratory research on next generation concepts for diagnostic and therapeutic devices; development of tools for assessing host-implant interactions; studies to prevent adverse events; development of predictive models and methods to assess the useful life of devices; explant analysis; improved in vitro and animal models for device testing and validation.

Relevant Programs

 NIH Bioengineering Consortium (BECON) (http://www.becon.nih.gov/becon.htm)

Relevant Study Sections

- Bioengineering, Technology and Surgical Sciences (BTSS) (http://cms.csr.nih.gov/PeerReviewMeetings/CSRIRGDescription/SBIBIRG/BTSS.htm)
- Brain Disorders and Clinical Neuroscience IRG (BDCN)
 (http://cms.csr.nih.gov/PeerReviewMeetings/CSRIRGDescription/BDCNIRG/)
- Integrative, Functional, and Cognitive Neuroscience (IFCN) (http://cms.csr.nih.gov/PeerReviewMeetings/CSRIRGDescription/IFCNIRG/)
- Molecular, Cellular, and Developmental Neuroscience (MDCN)
 (http://cms.csr.nih.gov/PeerReviewMeetings/CSRIRGDescription/MDCNIRG/)

A complete listing of review groups and study sections can be found at the Center for Scientific Review (http://cms.csr.nih.gov/PeerReviewMeetings/).

Program staff recommend that applicants include a cover letter listing areas of scientific expertise needed to review the application and how the expertise should be balanced (please do not include names), or potential study section assignments. Questions may be directed to the NIBIB contacts listed above.

April 2006 www.nibib.nih.gov

Funding Opportunities

The NIBIB supports a coordinated program of research and research training that can be applied across a broad spectrum of biological processes, disorders, and diseases. Potential applicants for NIBIB grants are strongly encouraged to discuss their proposed projects with the scientific staff of the Institute prior to preparing an application. Individuals can obtain guidance on the suitability of the project and the most appropriate funding mechanism or opportunity for the proposed research. The Institute supports research through a variety of NIH grant mechanisms such as:

- **R01** Research project grant to support investigator-initiated research projects.
- R03 Research grant to support projects requiring small amounts of funding for limited periods of time.
- R13 Conference grant to support high-quality scientific meetings, conferences, and workshops.
- R21 Exploratory and development grant to support projects that explore novel concepts.
- R43/R44 and R41/R42 Small Business Innovation Research and Small Business Technology Transfer awards that support exploration of ideas that may ultimately lead to commercial products or services.

Specific areas of scientific interest are publicized through program announcements (PA) and requests for applications (RFA). Additional information on current opportunities available at the NIBIB can be found by searching the Funding Opportunities Database on the NIBIB website at: http://www.nibib.nih.gov/publicPage.cfm?Section=funding&Action=Search.

NIH Roadmap Opportunities

The NIH Roadmap is a series of far-reaching initiatives designed to build on the progress in medical research achieved through the recent doubling of the NIH budget. The Roadmap focuses on three main areas: new pathways to discovery, research teams of the future, and re-engineering the clinical research enterprise. Additional information on NIH Roadmap initiatives can be found on the NIH website at: http://nihroadmap.nih.gov.

Looking to the Future

New and exciting programs are under development at the NIBIB. Up-to-date information on funding opportunities, workshops, and conferences can be found on the NIBIB website.

NIBIB Contacts

You may contact NIBIB program staff with your questions about funding opportunities or the application process. We welcome the opportunity to speak with potential applicants about the Institute's programs. Areas of scientific coverage for each member of the program staff can be found on the NIBIB website at: http://www.nibib.nih.gov/publicPage.cfm?pageID=2429.
